ERLÄUTERUNG DER I F A A IFAA-RUNDEN MIT WALKUPS

In general, Article 4 – clause I paragraph 7 applies.

This has in the different rounds the following consequences:

- a) Field & hunter round (4 arrows)
 On walk-ups and fans (on both categories same ruling applies), the archer has to walk to the next correct marker e.g. if he has shot the 2nd arrow from the first marker, he needs to walk up to the 3rd marker..
 If he would walk only to the 2nd marker he would lose the score of the 3rd arrow as well!
 (If he has shot the 3rd arrow from the 2nd marker, he needs to walk up to the 4th marker and shoot his 4th arrow)

- b) Standard Animal Round (marked or unmarked) – max. 3 Arrows
 If he missed with the first arrow from the first marker and hit with the 2nd arrow from the first marker, he loses the score of the arrow.
 As a consequence he needs to walk up to the 3rd marker and shoot his 3rd arrow. If this one hits, he gets the score related to the 3rd arrow.
 If he walks only to the 2nd marker and shoots the 3rd arrow from the 2nd marker, he loses the score of the 3rd arrow as well!

- c) Two – Arrow round (two markers)
 If he misses with the first arrow from the first marker and shoots the 2nd arrow also from the first marker, he loses the score of the 2nd arrow as well. Total result is zero.
 If he walks to the wrong marker (2nd instead of the first) and shoots the first arrow from the 2nd marker, the score of the arrow will not count. If he then shoots the 2nd arrow from the 2nd marker, the score of the 2nd arrow will count. If he moves back to the first marker and shoots the arrow from there, he will lose also the score of the 2nd arrow (since he shot from the wrong marker again)
